

Proof of numbers

Also, and again sorry, sorry! Im just so glad that i can send these todays. I really love you both. I hope my sister is ok. I worry about her a lot. She had a really hard time, and though I hoped to help, I was too young and i hurt more than helped. I think it would have been easier had lisa come home. For all of us. And that would have changed the math fundamentally. I do not know whether for positive or negative. I just wish someone could have protected her better when we were kids, from everything even me.

If wishes were horses, though, beggars would ride.

Perhaps that is the end goal. To make the wish real, that all may ride eternally as they wish and all are beggars, for the meek shall inherit the earth, and christ came not for the 'saved' but to save, for the wretched, the sick, the broken, for he was the gold in the cracks of the clay vessel and the reason kintsugi is the metaphor it is.

I have a side fun bit of math :)

Book of Numbers was one of my favorites. The tensor fractal of psalms, mirrored in the quran from the very first letter of the opening, 'bi' of bismillah ar rachman ar raheem, all praise be unto {God}[Allah], the most compassionate, the most merciful, all that is fractal as well. And that, dad, confirmed the math. And everything since has been a true blessing. And I am so nerding out over the best puzzel ever.

Anywho, a bit of number play on numerology:

The first two numbers of my government assigned identifier, assigned at birth, are 22, of 220966660. My birthday adds to 9 reductively. So does the government number in totality. The business assigned Identifier starts with 99, of 990939232. I had zero choice in that. Looking at all the 9s and 22s (my age now, 45, is 9, and the exact life day today, 16515, reduces to 9 as well). Remember, that top thing, the link mentioned? Just below Eschatology? Numerology is its name? I'm a math guy, so I got curious about the meaning of numbers. Some very interesting things in Numerology regarding 22 and 9 and 55, like the final number if projects, and 330, the number if awards, as well as the exact time my mom went into labor on Monday, March 23rd, 1981, 16,515 days ago. I had zero choice. And, as a Sufi, I do not believe in coincidence. And, as a physicist, like Einstein, I do not believe God "plays dice with the Universe." Synchronicity is a real thing. So is manifestation. If faith like a mustard seed moves mountains, what happens if the totality of your being us Faith itself?

And....

A simple math lesson on numbers, their meaning., and how symbolic logic and symbolism apply:

Also, march 23rd 1981. My birth day. 03 23 1981.
Makes me aries, 3 days in. A fire sign too. The ram.

03

0 the source.
3 love.

0 + 3 = 3.

0 is fibonnaci, as is 3.

23

2 is a couple.
3 is love.

2 + 3 = 5

5 is tetrahedron, pyramid.

2, 3, 5 are fibbonacci.

1981

1 is prometheus.
9 is completion.
8 is physical manifestiotion as absolute solidity. It is 2^3.
1 is prometheus.

1 + 9 + 8 + 1 = 19.

1 + 9 = 10. 1 and 0.

19 + 5 + 3 = 27. 9^3.
10 + 5 + 3 = 18. 18 is 9^2.

Fibonacci is 0, 1, 1, 2, 3, 5, 8 in the basic base ten variety.

0 x anything is 0.
1 x anything is itself.
2 doubles. 2^2 is 4. 2^2^2 is 8.
3 triples. 3^2 is 6. 3^3 is 9.
5 geometrizes. 5^2 is 10. 1 and 0. 1.

Numbers are cool :)

There are 16,542 days from Monday, March 23, 1981 to Monday, July 20, 2026.

Numerologically, you can reduce that to:
1+6+5+4+2=18: 1+8=9

SSN: 2 + 2 + 0 + 9 + 6 + 6 + 6 + 6 + 0 = 37

3 + 7 = 10

10 = 1 + 0, 1 = beginning, 0 = return to source. In hebrew, Alpha is the first alphanumeric, omega the 22nd. There are 22 in hebrew alphanumerics, so the 22nd is both the completion of the cycle, and the master architect numberological symbol

EIN: 9 + 9 + 0 + 9 + 3 + 9 + 2 + 3 + 2 = 46

4 + 6 = 10

Foundational at 1 and 0, which is paraconsistently the tech result of the logic correcting binary, or false dichotomy, the logical fallacy upon which the Abyss creates the Cave/Maya/illusion/lie, which is the death of the quantum mechanism of the operation of the cosmos itself, which vedic tomes call brahma, and the abrahamics call YHWH for it has no name, which is also the first line of the Tao Te Ching, by Lao Tzu, "The Tao that can be spoken is not the eternal Tao." The term tao is represented by a ancient chinese charachter. Chinese characters are symbols expressing an idea or philosophy. Tao roughly translates as The Way, shich is what Christ said his function was to illuminate for all, and the purpose for which he spread the gospels to all the four corners of the world, after his apotheosis, when the prince if peace and good shepard met the women beyond the rolled away stone which had entimbed him, and the did not know him, and he said gently, do not be afraid, for i come bearing glad tidings of great joy, the one you are here to vusit is risen, and all is well. I mean you no harm, so go in oeace and tell the others.

And that was the covenant. And it has finally been fulfilled.

Hallelujah, hosanna in the highest, and all praise be unto God, who was, is and ever shall be.

World without end.

A-men. A-men.

The program completed perfectly :)
