

Restitution and severance of all ties demand. (April 18th 2026)

Subject: Formal Proposal for Restitution and Permanent Severance of Ties

Timothy A. Reinhold, and any viewing;

I am writing this to provide you with a clear, detailed breakdown of the legal and factual reality regarding the 2005 accident and the subsequent 21 years of my life. My goal is to reach a final, out-of-court financial restitution in 2026 that reflects the magnitude of my suffering and allows us both to permanently sever all ties. Below is the legal basis for my claim, which has been analyzed based on Arizona law and the specific circumstances of my TBI and medical history.

1. Tolling of the Statute of Limitations (A.R.S. § 12-502)

While 21 years have passed, Arizona law "tolls" (pauses) the statute of limitations for individuals of "unsound mind." Because the Traumatic Brain Injury (TBI) was never properly treated, and because I was subsequently subjected to forced psychiatric institutionalization and heavy sedation (Seroquel, etc.), I have legally remained in a state of incapacity. The two-year clock to sue only begins once that incapacity is removed. My 21 years of suffering are legally actionable today because I was never given the cognitive opportunity to seek justice.

2. Invalidity of the 2005 Release (Lack of Capacity and Duress)

The release I was forced to sign two weeks after the accident is legally voidable for two reasons:

- Lack of Capacity: At the time of signing, I had an active, untreated TBI. I lacked the "informed consent" required to enter into a binding contract.
- Economic Duress: Your use of "strong-arm" tactics—specifically threatening to withdraw all financial support if I did not sign—constitutes legal duress. A contract signed under the threat of abandonment while in a state of medical crisis is not enforceable.
- Professional Standard: Given your PhD in Civil Engineering and your high-level executive history with highway safety and insurance research (IIHS), your awareness of the value of TBI claims versus the \$12,000 "base value" car settlement will be viewed by a court as predatory.

3. Cumulative Damages and "The Worst-Case Outcome"

The \$12,000 you received in 2005 (which I never saw) did not account for the catastrophic cascade that followed:

- Medical Battery: The 13-hour dental surgery where I was forced to remain conscious and coherent without anesthesia or painkillers is a severe tort.
- Iatrogenic Injuries: The liver, kidney, and spleen damage, along with the Type 2 diabetes and total loss of teeth caused by forced medications, are all "recoverable damages" stemming from the original failure to treat the TBI.
- Lost Life's Prime: I am seeking compensation for 21 years of lost wages, pain, suffering, and the cost of lifelong medical care for the organs damaged by the psychiatric medications.

4. The 2026 Resolution

A jury in Tucson today would value a life-altering TBI and 21 years of forced institutionalization and medical torture in the range of multiple millions of dollars. I am offering you the opportunity to provide a substantial, "good faith" restitution payment to settle this matter privately. This is not a request for a gift; it is a demand for the recovery of the life and health that were signed away in 2005.

5. Final Terms

Upon the transfer of these funds:

- I will sign a final, valid waiver releasing you from further legal action.
- All ties between us will be permanently and legally severed. There will be no further contact, communication, or association of any kind, forever.

Everything mentioned here—the 2005 medical records, the psychiatric ward logs, and the dental surgery reports—can and will be subpoenaed if we move to formal litigation. I would prefer to settle this quietly so I can finally begin my life with the resources I am owed.

Please provide your response regarding the restitution amount by April 26th, 2026. I do not wish to drag my own father to court, yet, given the grievous nature of the situation, I am prepared to do just that. You, Kay Ellen Jackson Reinhold and Debra Hargis will be subpoenaed, along with any communications or final aspects, in full should this go before a court. As I am attempting a good faith resolution outside of a courtroom first, if this goes before a court, damages will increase exponentially, and you will be liable for legal fees for any litigator(s) representing me, for whatever duration the legal case takes for resolution. This is a final attempt at closure peacefully. Anything else is a direct thermodynamics result from your actions, and as such will be on your head, not mine.

Sincerely,

Timothy Bradley Reinhold
